

WULAN ATIKASARI

Surabaya, Indonesia | atikasari904@gmail.com | 087855175957 | [My Portofolio](#)

ERP Functional Consultant with hands-on experience in Odoo and Microsoft Dynamics 365 implementations. Skilled in business process analysis, requirement gathering, system configuration, UAT execution, data migration support, user training, and post-go-live assistance. Strong understanding of Sales, Purchase, Inventory, and Accounting workflows, with the ability to bridge user needs and system solutions to improve operational efficiency.

EXPERIENCE

Kano Solution | Functional Consultant

Jan 2026 - Present | Surabaya

- Supported Odoo & Microsoft Dynamics 365 F&O (Supply Chain Management) implementation projects for multiple clients across operational workflows.
- Analyzed business processes and translated user requirements into system configurations and functional solutions.
- Executed system configuration, coordinated UAT, and resolved functional issues during implementation.
- Delivered user training and post-implementation support to improve system adoption and process consistency.

PT Sinergi Karya Solusindo | Functional Consultant Mar

2025 - Jan 2026 | Tangerang

- Created business process blueprints and flowcharts to map ERP requirements and future-state workflows.
- Prepared custom requirement documents for Odoo based on user discussions and operational needs.
- Led and supported UAT for Purchase, Sales, and Inventory modules, including issue logging and feedback documentation.
- Assisted data migration for master data and stock balances from legacy systems into Odoo.
- Developed user manuals and delivered end-user training to support go-live readiness and daily system usage.

PT CTech ERP Indonesia | ERP Intern (MSIB Kampus Merdeka)

Feb 2023 - Jul 2023 | Jakarta / Hybrid

- Supported business requirement analysis for multiple Odoo modules during implementation activities.
- Contributed to system setup, configuration, and feature enhancement for internal and client needs.
- Prepared documentation materials and tutorial videos to improve knowledge transfer and user onboarding.
- Provided internal user training support and assisted the team in day-to-day ERP project activities.

ERP PROJECTS

Business Process Analysis

Conducted business process analysis and workflow mapping to identify operational requirements and support ERP solution alignment for tour and travel business activities.

Odoo ERP Implementation

Contributed to the end-to-end ERP implementation process by supporting business process analysis, coordinating User Acceptance Testing (UAT), documenting functional issues, and assisting go-live activities across the Sales, Purchase, Inventory, and Accounting modules.

Data Migration

Supported data migration activities from the legacy system to Odoo, including data validation, data preparation, and reconciliation of master data to ensure accuracy and system readiness.

User Training & Post-Go-Live Support

Developed user documentation, delivered end-user training sessions, and provided post-go-live functional support to facilitate smooth user adoption and stable day-to-day system operations.

D365 FO ERP Implementation

Supported ERP implementation activities for manufacturing operations, including business process review, requirement documentation, UAT coordination, and user support to help align system functionality with production and operational needs.
